Full-Stack - Blockchain - Musician

PROFESSIONAL SUMMARY

Invested in bringing dynamic functionality to web apps and blockchain projects.
Problem solver passionate about providing creative solutions to backend integrations with front-end user interfaces.

SKILLS

JavaScript - CSS - HTML - ReactJS - Redux - Ruby - Bootstrap - NodeJS - Sendgrid - MongoDB - Postgres - ThreeJS - Solidity - Web3JS - DigitalOcean - Amazon AWS - Linux

PROJECT BASED EXPERIENCE

Blockchain Capstone Project
- Wrote Migration and token contract files with solidity for deployment on the Ethereum testnet
- Tested token and migration files with truffle, hardhat, and ganache to ensure immutable code standards

Project ANT
- Integrated frontend user interface with PostgreSQL for collection of client login credentials
- Tested backend endpoints with thunder client and postman to send/receive data payloads

Sendgrid Transactional Email
- Utilized a transactional email service that consumes data from the sendgrid api.
- Wrote serverless function that delivers data to sendgrid email template via Netlify functions & handlebars syntax
- Encoded URI component to access query parameters and pass data to backend serverless function

DarkMeowProductions
- Created NextJS website within the react framework
- Initialized react framework web application with custom contact form

Matias Sanes Musician Hub
- Utilized Javascript, CSS, and HTML to build an original user interface hub.
- Worked with Spotify and iframe elements to show music, life updates, and date/location of upcoming shows.

EXPERIENCE

React Developer | Freelance | Remote   **Feb 2021 - Current**
- Planned, wrote, debugged, and deployed a web application with React and styled-components.
- Integrated CommerceJS API to and EmailJS backend for contact and shopping functionality.

React Developer | Project ANT Internship | Remote   **Sep 2021 - Nov 2021**
- Leveraged React and Typescript to create client-side UI
- Queried data with PostgreSQL to match companies with developers

Full Stack Developer | Freelance | Remote   **June 2021 - July 2020**
- Configured media queries for xs, s, md, lg, and xl breakpoints
- Targeted site visitors with email subscription CTAS via Mailchimp API

Full Stack Developer | Resolution Enterprises | Remote   **Jan 2021 - March 2021**
- Created an incrementing counter displaying the national debt due to insurance fraud, increasing at $1300/second.
- Utilized regular expressions to place commas at the appropriate 1,000 & 1,000,000 positions.

EDUCATION

Blockchain Engineering Immersive Bootcamp | dApp University   **Nov 2021**
Bachelor of Humanities: Pre-Medicine | Florida State University | Tallahassee, Florida   **May 2016**
